

Leading with AI to protect schools from gun violence

A cost-effective solution to address the stress of gun violence that weighs on parents, faculty, and kids

REAL-TIME AI GUN DETECTION

Actuate's solution to detect weapons enables school administrators to take a cost-effective approach against gun violence. This leading AI technology alerts officials of potential threats before shots are fired. The technology leverages existing cameras, eliminating the expense of new hardware and costly installations. This innovative solution provides parents, kids and teachers an added layer of protection against gun violence, and offers peace of mind.

Product Features

- Making existing cameras smart with AI
- 99% accuracy in gun detection
- Pinpoint a shooter's location for law enforcement response
- Real-time, actionable alerts within seconds
- Human monitoring services available to eliminate false positives

Other Actuate Products for Schools

- Intruder Detection
- Loitering Detection
- Crowd Detection
- Fire Detection (beta)

DETECT GUNS IN SECONDS

REACT BEFORE SHOTS ARE FIRED

NO NEW HARDWARE OR INSTALL COSTS

"Parents are concerned about the safety of their children in schools and report feeling stressed, scared and angry—and many report that their children are feeling the same."
